

BUYERS GUIDE HAZARD SIGNS

The Health and Safety (Safety Signs and Signals) Regulations 1996 require you to warn workers, visitors and the general public of hazardous areas or materials on your premises. One of the most effective ways to do that is with our hazard warning signs. From machinery hazard signs to electrical warning signs and chemical warning signage to water safety notices, we have an extensive range of health and safety signs to help keep your premises safe and reduce the risk of accidents and injury.

FEATURES AND BENEFITS

- Available in a range of materials depending on your requirements
- Available in a variety of sizes.
- All of our hazard safety signs are fully compliant with ISO 7010.
- Custom signs available at request
- The signs should be placed in a clear, obvious area that makes them easily visible to anyone onsite.

AVAILABLE MATERIALS

Self Adhesive Vinyl

A cost effective high gloss PVC with a peel off backing, self adhesive vinyl is ideal for interior signage. This material adheres to most smooth, clean surfaces including curves.

Photoluminescent

Available on rigid plastic and self adhesive vinyl, this 'glow in the dark' material provides temporary visibility in the dark, making it ideal for fire signage. In line with the PSPA, standard signs are produced on Class B.

Rigid Plastic

Our best-selling material choice, 1mm semi-rigid plastic PVC is suitable for interior and exterior use. Signs are supplied with square corners, no holes as standard.

Foamex

A versatile PVC foam sheet with a smooth matt finish. This material is often used for temporary signs requiring a superior look. Available in 1, 3 and 5mm thicknesses.

Aluminium

A long-lasting, lightweight yet durable and recyclable metal that can be used for both interior and exterior signs.

Corrugated Plastic

A durable yet lightweight corrugated PVC material particularly suited to temporary signs and is a popular choice in the construction industry. Available in 4mm and 10mm thicknesses.

FAQS

Can self adhesive signs be used outside?

The sign must be applied to clean and dry surface, with use outside the adhesive will heat up and cool down and will eventually fail. It is not recommended to use self adhesive signs outside for long term use.

Do rigid plastic signs come with holes drilled as standard?

No, however these can be requested as no additional charge if you wish to install on a wall

What can I use to install my rigid plastic signs?

There are multiple methods to install rigid plastic signs depending on your requirement. You can use grip fill, drilled into the wall, cable ties, velcro strip or command strips

What is the best material to use outdoors?

Aluminium is the best material to use outside due to its durability to outdoor conditions

Can I get a bespoke sign made?

Yes, we can offer a complete bespoke sign , however minimum order quantities may apply dependant on style and size.

"All hazard signage are fully compliant with ISO 7010"
